Dialogue, Communication, Coordination -
A better to manage water
Dialogue, Communication, Coordination -
A better to manage water
Areas of Concern - Leaks and wastage (Q& Cost to users)

Pilot Project Areas of Concern – Being informed (formal/informal) about water – promote attitude change

Dialogue, Communication, Coordination - A better to manage water
Pilot Project Areas to:

- Resource owners at catchment level - CMPC
- Catchment assessments/surveys - values, additional water sources
- Assist Water Authority (SIWA) - WDM & security of source
- Women involvement - WUE/WDM @ h/hold level
- Water & Wastewater Education - awareness through radio, newsletters, curricula
- Policy & Legislation - IWRM into national policy & water legislation

Scope - Support & Engagement approach:

- SIWA - sustainable water supply, security & demand management, WSP
- MMERE - policy/legislation, hydrogeology
- NDPCC - sub committee/technical advise on CMP, WSP, IWRM project promotion
- HCC Women - WUE awareness & capacity building in basic maintenance
- Resource Owners - consent for access, participation & CMP committee reps
Stakeholders Engagement since project inception:

- Water Authority (SIWA) – scope of project
- MMERE – LA & IWRM Focal Point - admin
- National Demo Project Coordination Committee (NDPCC) & sub-committees – work planning & advise
- Honiara City Council of Women leaders – reps from associations/churches, NGOs
- Resources Owners (LOs) – main water source catchment management

Results of Engagement:

- SIWA – assist in LOs ID, hydrology, access
- MMERE – IWRM awareness – calendars, brochure, newsletter, radio programs, policy & legislation review, hydrology,
- NDPCC – approval of 1st & 2nd Qtrs workplan, budget, workshop facilitation and weekly IWRM radio awareness
- HCC Women – recommend practical WUE @ h/hold level after 2 workshops
- Resource Owners – consent for access, participation & CMP committee reps
Objectives Component:
Contributing stakeholders/community for project:-

- Integrated Catchment Management Plan -
  declare protected area, conservation & supply

- Water Safety Plans - risk assessment &
  documenting RM plans for SIWA

- Water Conservation/Demand Management Plan
  - saving water by change of attitude & fixing
    leaks @ supply (SIWA) & demand side
    (commercial & h/hold)

Summary

The IWRM Pilot Project has confirmed:-

- Issues about Honiara water supply situation with
  SH & resource owners (landowners)
- Active SH & community participation was
  indicated & promoted during engagement
- PMU through NDPCC & sub-committees will
  pursue activities based on project workplan to
  achieve its objectives.

THANKYOU
